**Subject: Additional information to register a new end-use product
STK-20; ABN: Regev, EPA File Symbol: 86182-L
Updated Data Matrix**

Dear Ms. Roe:

Wagner Regulatory Associates, Inc., as agent for Stockton (Israel) Ltd. (EPA Company Number 86182) is submitting an updated data matrix for the registration of the above referenced product containing the currently registered active ingredients tea tree oil (PC Code 28853) and difenoconazole (PC Code 128847).

On April 8, 2019, a data matrix for the above mentioned product was submitted for review and it contained product chemistry, acute toxicity, and ecotoxicity using STK-20; ABN: Regev as the test material for all studies.

It was decided that the submitter did not qualify for the formulator's exemption for tea tree oil technical as was claimed in the Formulator's Exemption Statement. On April 25, 2019, an updated Formulator's Exemption Statement, claiming only difenoconazole, and a data matrix for the tea tree oil technical material was submitted.

However, the two separate data matrices have caused some confusion and on June 7, 2019 the agency requested an updated data matrix be submitted combining the two matrices into one document where the product specific data be listed first and then followed by the tea tree oil technical data.

In support of this request, enclosed are the following documents:

- Letter from Stockton (Israel) Ltd. appointing Wagner Regulatory Associates, Inc. as its agent
- Application for Pesticide Registration (8570-1)
- Certification with Respect to Citation of Data (8570-34)
- Data Matrix for tea tree oil technical, EPA internal and public (8570-35)

Thank you in advance for your efforts in reviewing this submission. Please do not hesitate to contact me by email at rachel@wagnerreg.com or by phone at 302-635-7289 should you have any questions.

Respectfully submitted,

Rachel L Hardie
